Concerns Received Before Report Period	5
Concerns Received During Report Period	117

Note: Concern Info refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.

**Monthly Air Pollution Control Program Detail Report
Regional Office Concerns Received or Investigated
Between August 16, 2025, and September 15, 2025**

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62713	8/18/2025	8/21/2025	MOBest Meats LLC-Alex Pope	Odor Other	Sugar Creek /Jackson	KCRO	CK	Other
Concerned Party:		Anonymous						
Concern Info:		Via Webform email - 1 of 2 Submitted at 9:34 am Saturday, August 16, 2025 & Submitted at 10:24 pm Saturday, August 16, 2025 - Date of Incident or First Noticed: 08/15/2025						
		There is a property that is doing some kind of smoking or something inside. Every weekend they emit large plums of white smoke that has a foul odor. I have noticed it at my residence. It down to a building on Sterling Avenue. The facility is located in the back underneath some apartments behind a convenience store. I believe the address is 110 N. Sterling Ave. This has been ongoing for several months. I just recognized it again today and took a picture of the plume of smoke. (Photo was not attached to the email.) [sic]						
Conclusions:		No smoke was present at the time of the investigation, but a neighbor provided a photo showing the issue. At this time, the concern has been referred to the City of Sugar Creek to look into business licensing and code compliance. Further investigation may be required if the situation continues.

62714	8/18/2025	8/21/2025	Jeffery Doss	Scrap Tire Hauler Open Burning	Hardin /Ray	KCRO	CK	Other RTC
Concerned Party:		Anonymous						
Concern Info:		Via Webform email - Submitted at 1:09 pm Saturday, August 16, 2025 - Date of incident or First Noticed: 08/16/2025 Burning of tires. [sic]						
Conclusions:		Jeffery Doss admitted to burning couches and mattresses, which are prohibited items to burn. Doss picks up items around town, like appliances, couches and mattresses. He burns items such as mattresses and couches and then scraps any metal from those items. He also stated many people in town drop off items at his burn pile. A report with Unsatisfactory Findings will be issued with requirements that will need to be followed in order to comply with open burning and solid waste regulations.

62717	8/15/2025	8/19/2025	Multiple Facilities	Particulates	Carthage /Jasper	SWRO	BD	Memo
Concerned Party:		D. Zink						
Concern Info:		D. Zink (Concerned Party) has been monitoring the air quality at his house in the Carthage area. Anytime Zink goes outside, Zink's eyes and sinuses become irritated. Zink is aware of several facilities that discharge but is concerned about the air quality if all facilities discharge at the same time. Zink has three interests regarding the particulate matter and AQI values: Zink would like to collect samples and have them tested. Zink is concerned if a facility knows what they need to do to when operations change hands with new ownership. Zink would like to have at least one more air monitor installed in the Joplin area by EPA. Zink sent an e-mail to EPA and it was forwarded to DNR that describes in detail the air monitoring Zink has conducted. [sic]						
Conclusions:		SharePoint #14694 No air quality issues were observed and the concerned party has been contacted by the Air Pollution Control Program regarding emissions data and air quality monitors in the area. No further action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62725	8/19/2025	8/27/2025	Kevin Rodgers	Open Burning General Water	Orrick /Ray	KCRO	DS	Phone Conversation UF
Concerned Party:		Margie Long, City Clerk, City of Fleming						
Concern Info:		CP called to report burning of trash and other items near a creek in Ray County near the City of Fleming. The Mayor of Fleming is concerned about possible contamination of the creek as well as air issues with what is being burned. Concerned party states the Orrick Fire Department has already responded to the incident and advised the City to call the department. [sic]						
Conclusions:		Evidence was observed indicating prohibited items were burned, including a fiberglass ladder and vinyl siding. A report with Unsatisfactory Findings will be issued.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62731	8/18/2025	8/20/2025	Unknown	Odor	Ava /Douglas	SWRO	BD	Memo
Concerned Party:		Anonymous						
Concern Info:		Odors began May 1, 2025 and are ongoing. Acrid, manure or farm animals, rancid or rotten, sewer, trash. Basically it is a failure to use personal hygiene along with maybe under 10 pets all accumulating. [sic]						
Conclusions:		SharePoint #14713 A source of odor could not be determined, and the address listed is a residential house. No further action is required.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62732	8/18/2025	8/21/2025	Horizon Excavating LLC	Permitting Land	/Taney	SWRO	BD	Letter
Concerned Party:		Anonymous						
Concern Info:		Anonymous caller states that a land disturbance area has developed a quarry at coordinates 36.584993, -93.257523. No active land disturbance, stormwater, or air permits have been issued for this site. [sic]						
Conclusions:		SharePoint #14701 An Unsatisfactory Finding Response Required will be issued to Horizon Excavating for failure to apply for a construction permit for the portable rock crushing equipment in accordance with 10 CSR 10-6.060 Construction Permits Required. This action will be tracked in ACE.

62735	8/19/2025	8/22/2025	Unknown Contractor	Asbestos Open Dumps:	/Miller	SWRO	CR	Letter LOW
Concerned Party:		Anonymous						
Concern Info:		The anonymous concerned party called to report asbestos siding shingles are being removed from a building in Iberia (833 Hwy 42, Iberia). The asbestos shingles are being scooped up and thrown into a dump truck. The dump truck is hauling the shingles to a local farmer's land (801 Hwy C, Brumley) and dumped in a hole and being buried. The concerned party followed the dump truck and saw where the waste was being dumped, and said the hole is visible from Hwy C. The local farmer is reportedly Steve Pendleton according to the concerned party who had found his name on the Miller County Assessor's GIS website. The concerned party voiced his concerns to the City. City workers and police are reportedly supervising the work. The name of the local demolition contractor is unknown. [sic]						
Conclusions:		SharePoint #14727 A Letter of Warning will be issued to the property owner for failure to notify the department prior to demolition of a commercial building. See report for more details.

62739	8/19/2025	8/21/2025	Capital Materials	Fugitive Particulate Matter	Ozark /Christian	SWRO	CR	Site Visit
Concerned Party:		Anonymous						
Concern Info:		Caller stated that while driving along Highway 65 they observed a "300 foot plue" of dust coming from the Capital Materials quarry and blowing west across the highway. [sic]						
Conclusions:		SharePoint #14733 No fugitive dust was observed at the time of the investigation. No further action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62741	8/18/2025	8/19/2025	Donald Peters	Open Burning	Harwood /Vernon	SWRO	JW	Site Visit
Concerned Party:		Anonymous						
Concern Info:		An anonymous caller states that a property at the location of 101 Brown Street, Harwood, Missouri, is burning constantly. RP states that he smells sewage and has seen toilet paper and what appears to be sewage spilling onto the ground. Caller says a backhoe was on site but is unsure of the reason. [sic]						
Conclusions:		SharePoint #14708 I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62742	8/19/2025	9/2/2025	Northern Stone County Road Dept.	Open Burning Fugitive	 /Stone	SWRO	BD	Site Visit
Concerned Party:		Danny G Harness						
Concern Info:		The online concern submittal states: "They have been open burning there for several years! They are not 500 ft from my front door as state law requires! They are not just piling trees and brush they're pounding dirt and rocks in the same pile! And they have contaminated dirt about 50 ft from where they'll be burning! And they have put new gravel down and it's choking me out when the trucks come in and I have had dust pneumonia before!" [sic]						
Conclusions:		SharePoint #14738 No air violations were observed regarding open burning or fugitive emissions.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62744	8/20/2025	8/26/2025	Simmons	Other	Southwest City /McDonald	SWRO	JW	Email
Concerned Party:		Anonymous						
Concern Info:		A letter was sent to the department regarding the air quality and regulations at the Simmons Rendering Plant in Southwest City. The letter reads as follows: "Please come inspect the Simmons Rendering Plant in Southwest City! I am a worker there. I don't know what laws Simmons are supposed to be following. I do know that the machines that are there to clean the air are not working right. If the machines worked right us workers would not have to be working in high H2S levels. There is a air machine on top of the feather bay that did not work all winter. It had steam blowing out of it all of the time. Come check it all out before we get hurt." [sic]						
Conclusions:		SharePoint #14750 I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62745	8/20/2025	8/29/2025	Scenics Quarry	Fugitive Particulate Matter	Walnut Grove /Greene	SWRO	BD	Site Visit
Concerned Party:		Anonymous						
Concern Info:		Releasing a lot of dust right out of the quarry, maybe from creating gravel or working with limestone or marble. They did not have an issue with this until the new owners (Conco) took over. [sic]						
Conclusions:		SharePoint #14754 No violations of 10 CSR 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin were observed at the time of the investigation. I observed the crushing processes and did not observe any opacity issues and adequate water is being applied to reduce fugitive emissions. No further action is required.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62746	8/18/2025	8/20/2025	Maguire Iron	Fugitive Particulate Matter	Vandalia /Audrain	NERO	SB	Report RTC
Concerned Party:		Anonymous						
Concern Info:		The concerned party explained the City of Vandalia's water tower was in the process of being sandblasted and was not covered to contain the sandblasting material and paint being removed. The concerned party expressed concern about the sandblasting material and paint getting into the water treatment plant near the tower. [sic]						
Conclusions:		Found evidence of fugitive particulate matter on the ground on the neighboring property in violation of the fugitive dust rule. Require a clean-up and a response from both the city of Vandalia and Maguire Iron.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action

62750	8/22/2025	8/27/2025	Unknown	Other	St. Joseph /Buchanan	KCRO	DS	Other
Concerned Party:		Anonymous						
Concern Info:		From webform: I drive by this area daily. The smell is like rotten eggs or septic smell. [sic]						
Conclusions:		No odors were found during the investigation.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62757	8/22/2025	8/27/2025	Steven Cochran	Open Dumps Open Burning	Raymore /Cass	KCRO	JS	Other
Concerned Party:		Anonymous						
Concern Info:		Anonymous CP left vm on COD line-states man living at 209 Olive St in Raymore MO has been piling junk at his home-some of the junk is now spilling into the street also they have bonfires and CP believes he is burning the junk (not sure exactly what is in the burn piles) CP stated odor is terrible and has been giving their dog fleas. CP contact the City of Raymore and they send letters, but the letters are only getting to the daughter and not the person who owns the property. [sic]						
Conclusions:		No violations were observed during the investigation. Items on property appear to be for sale and stored in a manner to indicate their value is being maintained. No evidence of burning was observed, and an interview with the responsible party indicated no prohibited items have been burned.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62759	8/22/2025	8/28/2025	Brandon Zimmerman	Odor	Tunas /Dallas	SWRO	JW	Site Visit
Concerned Party:		Anonymous						
Concern Info:		The caller states that his family has noticed heightened odors associated with his neighbor's new chicken farm. This chicken farm allegedly has 80,000 or more egg-laying chickens which puts it right at the threshold for a Class 1C CAFO. Class 1C CAFOs are subject to wastewater permitting requirements. Class 1A CAFOs are subject to odor monitoring plan requirements as outlined in 10 CSR 10-6.165. This operation is unlikely a Class 1A CAFO since 7,000 animal units or more are needed. The farm may be subject to the odor regulation if it has a wastewater lagoon. The concerned party has been advised to call MDA as well. [sic]						
Conclusions:		SharePoint #14778 I did not observe any violations during this investigation. No action is required.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62779	8/22/2025	8/22/2025	3M Company	Hazardous Air Pollutant Release	Columbia /Boone	NERO	SB	Referred to Other Agency
Concerned Party:		Anonymous						
Concern Info:		The caller reports that in January or February of 2025, the 3M plant in Columbia released about 70 or 80 gallons of Sulfur Hexaflouride to the atmosphere. This gas was in the purification department and used for biofiltration in the coater. It was necessary to release the gas to work on equipment. Garden hoses were spread out to the lawn outside the building and the gas was released. The Plant Manager, the safety Mgr., and HSE Mgr. were all involved in the release. There should be work orders showing that this was done. It is believed that Sulfur Hexaflouride is a greenhouse gas. It is also called FF6. [sic]						
Conclusions:		This is possibly a TSCA issue, which is administered by EPA Region VII. Forwarded to Mary Woodruff, EPA Region VII (913)551-7056, for investigation.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62780	8/25/2025	8/26/2025	MFA Agri Services	Water Discoloration Odor	Higginsville /Lafayette	KCRO	AW	Phone Conversation
Concerned Party:		Susan Roach						
Concern Info:		Caller says the MFA mill in Higginsville is dumping waste into the creek that runs behind her house. She thinks they are cleaning out stuff from the bottom of the silos. The water in the creek is blue and cloudy and smells bad. The caller says they have been warned once before to dump into their underground tanks, but they are dumping into the creek. The dumping is still ongoing.						
		Caller described the facility as at Fairground and Walnut Road, but appears to be the one on W. 22nd Street. She said the creek is located on the west side of Locust. [sic]						
Conclusions:		No further action.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62782	8/25/2025	8/15/2025	Travis Bilyeu	Sanitary Landfills Open Burning	Chadwick /Christian	SWRO	MK	Site Visit
Concerned Party:		Anonymous						
Concern Info:		From Webform: Travis Bilyeu has started a landfill in his yard. He is dumping rollofts every day. He has also burned the trash in his yard. [sic]						
Conclusions:		SharePoint #14788 A letter of warning was issued and is being tracked through concern 14664						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62786	8/25/2025	8/26/2025	IsoNova Technologies	Odor	Verona /Lawrence	SWRO	JW	Site Visit
Concerned Party:		Robert Jungbluth						
Concern Info:		The concerned party stated that they observed exceptionally bad, rotten egg smells emitting from the IsoNova plant on Saturday and Sunday (08/23-08/24) when winds were blowing out of the N. The smell persisted for 1-2 hours. [sic]						
Conclusions:		SharePoint #14795 I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62787	8/25/2025	8/26/2025	Josh Corn	Open Burning Bypass or	Cassville /Barry	SWRO	CR	Letter
Concerned Party:		Patrick Johnston						
Concern Info:		The concerned party states that he is a resident of Tanglewood Mobile Home Park and is experiencing effluent surfacing in his yard at Lot 7 and notes that there is also visible surfacing of effluent at Lot 8. The Mobile Home Park is on a shared lagoon. The lagoon is shared between 5 trailers and 2 houses, with the lagoon being located to the West of the 2nd and 3rd trailers. The concerned party (CP) states he was referred to us by the Barry County Health Dept. The CP also mentioned a burn pile on the property located beyond all of the trailers, and when viewed on maps appears to be on the East side of the roadway. The CP states that the burn pile contains tires, plexiglass, and mechanical appliances such as a washer and dryer. He noted that there were several tires under a downed 30 foot tree in the burn pile. [sic]						
Conclusions:		SharePoint #14797 An informational letter is being sent to the property owner containing regulatory information for open burning and solid waste. Contact has been requested to discuss the concern and regulations at more length.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62791	8/25/2025	8/26/2025	Chris and Jenni Douglas	Hazardous Air Pollutant Release Open Burning	Creighton /Cass	KCRO	CK	Other
Concerned Party:		Anonymous						
Concern Info:		From Webform email: Date of Incident or Date First Noticed 08/24/2025 My neighbor burned hazardous materials [sic]						
Conclusions:		No evidence was seen to support the concern of a hazardous air pollutant release. The property owner states that they have trash pickup and do not burn anything other than vegetative waste that originates from the property or miscellaneous cardboard, which would be a household waste. No open burning violations could be determined at the time of the investigation.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62798	8/26/2025	8/26/2025	Levi Battles	Other	Dexter /Stoddard	SERO	JE	Referred to Other Agency
Concerned Party:		Anonymous						
Concern Info:		Owner of house at the corner of Stoddard Street and S. Hickory Street in Dexter, MO is burning is tearing part of house down and burning rotting flooring in a trash can out in the backyard. [sic]						
Conclusions:		Upon receiving the concern, I contacted code enforcement with City of Dexter. I spoke with Officer Ashton Grainger and informed them of the concern. She stated she would look into the concern in regards to city code. I offered to have a discussion on open burning at a later date if she felt that would be beneficial.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62800	8/26/2025	9/8/2025	Springfield Ready Mix	Fugitive Particulate Matter	Springfield /Greene	SWRO	BD	Site Visit
Concerned Party:		Anonymous						
Concern Info:		Dust from mixing plant located on the back or southern portion of the facility. Has been observed blowing southwest towards residential housing. [sic]						
Conclusions:		SharePoint #14823 No evidence of fugitive emissions were observed around the property boundaries, and no fugitive emissions were leaving the facility at the time of the investigation. No further action is required.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62804	8/27/2025	9/2/2025	Northern Stone County Road Dep.	Open Burning	Galena /Stone	SWRO	BD	Site Visit
Concerned Party:		Danny GG Harness						
Concern Info:		FROM EMAIL: "They are getting ready to burn a large brush pile again across the road from my home, not 600 feet from my door! They get ash all over my home and my auto! I have breathing trouble, and all the dust and smoke make it harder! I have turned them in many times last year! But they have moved their gas pumps closer to where the brun pile is! When they burn it goes on for days, and nobody watches it" [sic]						
Conclusions:		SharePoint #14838 No air violations were discovered during the investigation into the repeat concern 14738. No further action required.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62810	8/27/2025	8/27/2025	Unknown	Other	Kansas City /Clay	KCRO	MC	Other
Concerned Party:		Anonymous						
Concern Info:		Caller reports visible clouds formed by planes over Kansas City in Clay County. Caller is concerned the planes are spraying some type of chemical all over the area. This has been going on for years. Caller no longer hears any crickets or sees any snakes and believes the chemicals are killing them off. The spraying is also leaving a red substance in his birdbath. [sic]						
Conclusions:		EPA has an informational page on contrails (https://www.epa.gov/regulations-emissions-vehicles-and-engines/Contrails). From EPA and FAA factsheet (https://www.epa.gov/system/files/documents/2025-07/epa-faa-contrails-factsheet-2025-0718.pdf): Although persistent contrails visible in the sky for hours may cause public concern, they do not indicate an airplane had dispersed harmful chemicals. The U.S. Government is not conducting weather modification nor releasing harmful agents into the atmosphere. The EPA and FAA will take appropriate actions to address any substantiated claims of unauthorized spraying of chemicals. Referred to EPA for any necessary follow-up.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62811	8/25/2025	8/25/2025	City of Poplar Bluff	Particulates Bacteria in	Poplar Bluff /Butler	SERO	MW	Communication In Person
Concerned Party:		William Jackson						
Concern Info:		Black stuff in the water - City of Poplar Bluff. [sic]						
Conclusions:		I investigated this concern on the afternoon of August 25, 2025, with William Jackson (CP). Mr. Jackson showed me black specks in his Brita Pitcher and in a mason jar where he had collected a water sample. I tested the CP's water for chlorine and bacteria from an outside frost-free yard hydrant and obtained the following results: Chlorine (Free) - 0.85 mg/L Chlorine (Total) - 0.89 mg/L (1) bacteriological water sample - SAFE I did not observe any black specks in the CP's water during the investigation.

Concerned Party:		Jason H. Withington, Western Commissioner at Larg						
Concern Info:		Via email - KCRO inbox - Sent: Friday, August 29, 2025 9:00 AM - Subject: Mosby Rock Quarry Blasting As a Clay County Commissioner, I am writing on behalf of numerous constituents who reside near the Mosby Rock Quarry in Clay County, Missouri. These residents have raised serious concerns about the impacts of quarry blasting—including cracked foundations, broken windows, structural vibrations, and declining quality of life. Despite repeated attempts by citizens to contact state and federal agencies regarding blasting oversight, their concerns have gone unanswered. They are looking for relief and accountability, yet have been unable to obtain a meaningful response from the responsible authorities. (Unable to entered complete text from Sharepoint due to ACE character limit.) [sic]						
Conclusions:		This concern was sent to multiple State agencies and state legislators. The concern was referred to the department's legislative liaison to coordinate a response.

62828	8/29/2025	8/29/2025	Leslie Corr	Open Burning	Climax Springs /Camden	SWRO	CR	Site Visit
Concerned Party:		George Creamer, Fire Chief, NWFPD						
Concern Info:		From email: "Good evening, I'm reporting another incident involving the illegal burning of materials at 340 Twin Coves Road, Climax Springs, MO 65324. Unfortunately, a structure appears to have been torn down and burned on-site. While there were some tree limbs in the pile, there were also significant remnants of PVC, insulation, treated lumber, and furniture all of which are prohibited materials for open burning. In addition, there is a separate pile nearby containing unburned treated lumber and a large piece of dock foam, which appears staged for future burning. I believe the property is owned by Leslie Corr (Phone: 816-309-3045). I attempted to make contact by phone, but it went straight to voicemail. Ms. Corr was not present when we arrived. Notably, the fire had already gotten out of control and spread into the neighbor's yard, causing damage to their wood retaining wall and surrounding area. Please let me know the next steps or if additional documentation is needed." A follow-up email was received that stated: "Unfortunately, they lit off the treated lumber pile as well as the large piece of dock foam this morning." [sic]						
Conclusions:		SharePoint #14882 Letter of Warning - No Response Required issued for the burning of regulated materials. Please see report for more details. Tracked under Concern #14877.

62848	8/26/2025	8/28/2025	Darren Adams	Open Burning	Centralia /Boone	NERO	SB	Report LOW
Concerned Party:		Lucas Caples						
Concern Info:		Darren Adams, a known businessman within the City of Centralia, has been burning construction materials and rubber tires throught the nights, causing large black smoke clouds to be covering the area. Adams owns multiple business' witin the City of Centralia and has been utilizing his business' to burn and destroy items that should be discarded in a more environmentally friendly manner. Adams gives no regard to the environment around where he is burning, and there are ponds and streams directly behind the run off of where these items are being burned to the extent of when they were put out with water, all the water ran into these streams. Adams believes due to his standing withing the city and for the amount of money he has, a small ticket we are able to give him on our end is nothing to him and mearely only manner of premcium buring. I do not know this for a fact, but have been advised Adams has been doing this for years around the Boone COunty area, and has been advised not to do such actions but still continues to do such actions. Adams was caught this morst recent time doing this at 875 West Singleton, Centralia, Boone County, Missouri. Any additional information can be obtained from the Centralia Police Department case 25-000181 as well as photographs which this system would not let me upload due to size. [sic]						
Conclusions:		In violation of the Missouri Open Burning Regulation for burning tires. Issue a Letter of Warning and require a clean-up of remaining debris, photos, landfill receipts and a signed Air Pollution Response letter.

62857	9/4/2025	9/5/2025	Mid-States Materials	Particulates	Bates City /Lafayette	KCRO	MC	Other
Concerned Party:		Anonymous						
Concern Info:		Via Webform email - Submitted at 7:41 am Thursday, September 4, 2025 - Date of Incident of First Noticed: 09/04/2025 I received a message from my neighbor that a quarry started operations, Mid-States Materials. Read it after walking my dog and then checked the air quality on IQAir. It showed more pollution than Kansas City and dangerous for sensitive individuals. I am very sensitive and cannot walk my dog if pollution at my rural home. In addition, there are about 70 seniors living near me. This can hurt me and other neighbors. We didn't have a warning. I am not breathing well. [sic]						
Conclusions:		Mid-States Materials has not started operations yet. At the time of the concern, the area was experiencing impacts from wildfire and agricultural burning smoke; therefore, the observed elevated monitoring data is likely due to the smoke impact. Confirmed with Mid-States that the site is not yet in operation.

62870	9/3/2025	9/5/2025	CVS Pharmacy #8570	Asbestos	Blue Springs /Jackson	KCRO	CK	Phone Conversation
Concerned Party:		Jennifer Ussack						
Concern Info:		On 07/30/2024 the informant saw an employee for concerns related to mold exposure in the clinic setting. On 07/21/2025 petri dishes were obtained collecting mold samples in side A of the Minute Clinic with significant mold production. On 07/26/2025 petri dishes were obtained collecting mold samples in side B of the Minute Clinic with significant mold production. On 08/20/2025 there were contractors who presented to the store to obtain samples and we were told there would be a 24 hour turn around on samples and as of 08/29/2025 have still not received the results. There were also reports of asbestos being found in the floor tiles. Several pharmacy technicians, store personnel, nurse, and nurse practitioners have reported illness symptoms that worsen at work and resolve after having time off from the location. EPA assigned the concern to Arnold Stevens, EPA Region 7 Air and Radiation Division, per mold concerns. Arnold talked to the informant on 09/02/2025 and recommended the informant recontact OSHA per the mold concern. Forwarded to MoDNR for follow-up per asbestos concern. [sic]						
Conclusions:		No source of regulated asbestos work was found at CVS Store #8570 since there was no renovation or demolition work occurring. The store manager pointed out a blue/green colored adhesive under some carpet squares by a few endcaps that had been repositioned and stated that one of the employees thought that the adhesive may contain asbestos. The material appeared to be in good condition and not friable. The material has not been sampled, so asbestos content is unknown. Corporate HSE Manager was communicated with through email and provided with the asbestos fact sheet (PUB2157) for any future remodel work. Concerned party has also reached out to OSHA.

62876	9/2/2025	9/5/2025	County Line Road	Fugitive Particulate Matter	Plattsburg /Clinton	KCRO	MC	Email
Concerned Party:		Arthur Bilton						
Concern Info:		The amount of gravel dust coming off County Line Road is excessively high. The road is heavily traveled, which causes large amounts of dust to be released into the air, creating both safety and environmental concerns. Included are photographs for reference: One of our mailbox located directly on the road. Two showing the hoods of our vehicles, parked approximately 200 feet from the road. One taken from the rail of our pool deck, approximately 300 feet from the road. These images illustrate the extent of dust accumulation on our property caused by the road conditions. [sic]						
Conclusions:		I advised the concerned party that fugitive emissions from unpaved public roads do not violate Missouri's air pollution regulations. Advised concerned party to work with county officials.

Concerned Party:		Anonymous						
Concern Info:		This building was bought by East Central College (ECC) this year and is being renovated currently to allow for a new ECC campus and its "Early College Academy". As part of this program, high school aged children (grades 8-12) will occupy this building during the day, causing it to fall clearly under the RRP rules, due to its age. But currently this building is a dusty mess, with clouds of dust even coming out of the building and laying in the parking lot and even has asbestos being removed in this dust and no mask on at all (I have photos). Please STOP this disaster right away, and keep our local neighborhood and children safe from these toxins.						
		Consulted with Candace Bednar and due to the age of the children at the school this does not fall under RRP. She also indicated that the alleged violator did notify of an asbestos abatement: https://dnrservices.mo.gov/env/apcp/asbestos/abatement-details.php?param=A8982-2025. Forwarded to MoDNR for follow-up. [sic]						
Conclusions:		No violations were found.

63051	9/8/2025	9/10/2025		Odor	/Lincoln	SLRO	LZ	
Concerned Party:		No name given						
Concern Info:		We received an odor concern that was referred to us by the EPA. The CP states: There is a septic company that is pumping their trucks and disposing of human waste on the ground. I can no longer have my windows open in my home, drive by or sit outside without the smell. It is giving us headaches and the smell is nauseating. People driving by can smell it as well as anyone living near this ground. [sic]						
Conclusions:		No odor was detected in the area at the time of the investigation. No violations noted.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
63099	9/11/2025	9/11/2025	Auburn Lake Wastewater Treatment Facility	Odor Minor	/Lincoln	SLRO	AC	
Concerned Party:		Holli Johnson						
Concern Info:		SLRO PDW received a concern regarding the drinking water appearance within the Auburn Lakes subdivision in Lincoln County. Along with the drinking water issue, they received the following: "Most recently, our lift station has been putting off an awful smell as well. If that is something that could looked at that would be great too." [sic]						
Conclusions:		On September 11, 2025, I contacted the DNR PDW employee Caroline Kazmierski about this concern to get more information. Caroline stated that this concern was primarily a drinking water issue due to a brown water concern, but she forwarded this concern to WPC because the Concerned Party threw out a line about Auburn Lake WWTF's list station giving off a smell. Caroline also stated that during her own investigation of this concern she had concluded that these two issues were unrelated, with the brown water being caused by iron in the CP's water source. Caroline then suggested that I talk to her contact for Auburn Lake, Isabel Sassen, the EHS Compliance Coordinator. I then called Isabel Sassen to ask her about this concern, and Isabel stated that she was not aware of any issues with the facility, but she would speak to the facility's operator about it and call me back with more information. After speaking with Isabel, I looked through DNR records and found that Auburn Lake WWTF was last inspected January 27, 2025, by Chris Maher. And the facility was found to be In Compliance with its operating permit, with a Finding of Compliance letter being sent to the facility on February 7, 2025. I then looked up this facility on MOCWIS for its eDMRs and found that this facility has not had a DMR violation for the past three quarters. On September 12, 2025, I called Isabel back to ask if she had found any new information about this issue and she stated that she had spoken with Auburn Lake WWTF's operator, and he had stated that the facility's lift station giving off a smell was a common occurrence that would occasionally happen. However, the facility itself was experiencing no operating issues, and the operator was planning to pump fresh water through the facility in an attempt to get the smell to go away. Isabel then stated that she had received no complaints about a smell coming off of Auburn Lake WWTF. After speaking with Isabel, I then called the Concerned Party, Holli Johnson, to report my findings after investigating this concern. I stated that according to the facility's operator Auburn Lake WWTF was having no operating issues, and that a smell from the facility's lift station was not uncommon. But also, that the operator was planning to pump water through the facility in an attempt to get the smell to go away. I also told Holli that the DNR had inspected this facility in the recent past and had found no violations against its operating permit. However, I also told Holli that if the odor coming off of Auburn Lake WWTF continued, or if she suspected another issue with this facility, that she should call the MDNR office back and report it.

63116	9/11/2025	9/11/2025	Mississippi Lime Co. Road and Rail	Other	Ste. Genevieve /Ste. Genevieve	SERO	JE	Phone Conversation
Concerned Party:		Anonymous						
Concern Info:		Incident Description: These companies creating devastating noise pollution in the city of ste Genevieve. The train car collisions are vibrating homes 100 feet from the tracks. They are making explosion level noise when they slam together at all hours of the day and night. Sleep is being disrupted in dozens of households I bet. Trains are idling in front of homes. They are blocking crossings. They are spilling white powder out of their cars that's running off into the ground and streets and into waterways. Please make them stop [sic]						
Conclusions:		No violations were observed at the time of the investigation.

63129	9/10/2025	9/11/2025	James "J.R." Johnston	Open Dumps Open Burning	/Audrain	NERO	BH	
Concerned Party:		Anonymous						
Concern Info:		Caller states that the storage of materials consisting of concrete, machinery, farm equipment, vehicles, etc.; and burning of various wastes is being conducted on a property east of Vandalia. According to the caller, the owner of the property bought it approximately one year ago and conducts auctions at the site. They also added that whatever doesn't sell gets left on the property or burned if it is capable of being burned. The caller stated that "you could find anything and everything" on the property and that burning is conducted once a week. The caller couldn't specify what particular wastes are being burned but mentioned that waste from old mobile homes had been burned previously. The caller added that the property was formerly the site of Countryside manor. [sic]

63173	9/2/2025	9/3/2025	C&R	Asbestos	Boonville /Cooper	NERO	DB	Phone Conversation
Concerned Party:		Jeff						
Concern Info:		Caller reports that he heard from an associate that C&R in Boonville was planning to remodel the front of the store this September and he noticed a dumpster in their parking lot today. Stated he would like to know if they did a proper asbestos inspection before starting. [sic]						
Conclusions:		I called the store and spoke with the manager. She informed me that there is no remodeling going on and that they are doing a reset, which is moving product around without tearing anything out or moving shelves, and they brought in the dumpster to throw away a bunch of unused fixtures from the back room.

63190	8/28/2025	9/3/2025	City of Bethany	Asbestos Open Burning	Bethany /Harrison	NERO	DB	Phone Conversation
Concerned Party:		Anonymous						
Concern Info:		Caller reports that the Mayor of Bethany (Lance John) had the fire chief (Jacob Denim) burned down a house for disposal without removing asbestos or shingles or anything. States there are plans for at least one, maybe three other houses to be burned. [sic]						
Conclusions:		I called Jacob Denim (fire chief) and discussed the concern with him. He said the fire department did fire training with cold smoke (straw in a barrel) in the hoarder house on Main St, and the night after the training the house burned for real so they extinguished it. The other house was also used for training but did not burn. He stated both houses were inspected for asbestos and will be demolished in maybe a month.

63213	9/11/2025	9/15/2025	Brandon, Braxton	Fugitive Particulate Matter	Hannibal /Ralls	NERO	DB	Site Visit
Concerned Party:		Anonymous						
Concern Info:		Caller reports that neighbor is sandblasting, causing dust. Repeat concern. States they do large items like horse trailers, semi frames and such as well as painting. No normal schedule. [sic]						
Conclusions:		No violation found during the investigation. At the site, found no sandblasting or dust. Discussed concern. They informed me they are planning to get a containment building set up and they need it for work during the winter anyway, it may be about 4-6 weeks before it is available. Stated dust from sandblasting is similar to road dust and they have both sides of the road, so it doesn't really get onto neighboring properties.

63243	9/9/2025	9/15/2025	City of Louisiana	Asbestos	Louisiana /Pike	NERO	DB	Site Visit
Concerned Party:		Steve Henry						
Concern Info:		Webform states: "Isn't a government building supposed to get an asbestos inspection before they do demolition work? The mayor of the city of Louisiana and his wife did a bunch of work on the 2nd floor of the city hall winter of 2023 and still had the ceiling open when they opened it up as the new council chambers. They tore out 4 or 5 walls along with ceiling sections where those walls were and they did it themselves, there was no one who came to do asbestos removal. The employees and citizens were still in that building every day while that was all being torn out. Were we all exposed to asbestos because they did that? They also tore out walls downstairs months earlier to make a couple rooms into the Clerk and Treasurers office then the Clerk died that fall when she was a healthy woman. If there is asbestos floating around in the duct work and all over now are we all being exposed every time we go into city hall for council meeting, or to pay the water bill?" [sic]						
Conclusions:		Likely violation of the asbestos regulations two years ago, no active violation. Provided information. At site, spoke with Clinton Keller. He provided records showing limited asbestos inspections of the ceilings, but no complete inspections. Renovations done almost two years ago included removing internal walls, putting down new flooring, and finishing ceilings in areas exposed by wall removal. As this not a current violation, provided information and recommendations.

63287	9/10/2025	9/11/2025	Unknown	Odor	/St. Louis	SLRO	RA	
Concerned Party:		Christopher Player						
Concern Info:		A concerned citizen called the EER hotline and reported an odor concern. The caller states: The caller stated that while driving through his neighborhood, he noticed an odor every time he crossed Coldwater Creek. The odor was described as a sulfur smell similar to a catalytic converter odor. The caller stated they have lived in the area for 15 years and have never smelled something like this but it appears to be coming from Coldwater Creek. A Metropolitan Sewer District (MSD) treatment facility is located very close to the indicated odor areas. The caller stated that this odor is different from the usual odor MSD has during normal operations. [sic]						
Conclusions:		The site is within St. Louis County. I referred the concern to St. Louis Dept of Public Health APCP.

Concerned Party:		Danielle Gierer						
Concern Info:		We recieved an Odor concern from the EPA. The CP states: There has been a terrible industrial smell in the Soulard area that is well documented as I see many search related topics regarding former congresswoman Cori Bush's efforts which seem to have gone nowhere. Sometimes the smell is not so bad but the last couple of days (end of Aug 2025) it's been hideous. For 2 years I've been hearing complaints in Soulard with no answers. My girlfriend at 9th and Sydney says she's bothered by it even with her windows closed, well yes! That's all of us! Closing the windows doesn't help at all. What are we smelling? It's so toxic smelling that it has to be affecting our health. Help us!!!!!!!!!!!!!! [sic]						
Conclusions:		A site investigation was conducted on 9/3/25 and no strong odors were found.

63304	8/29/2025	9/3/2025	Unknown	Odor	/St. Louis City	SLRO	RA	
Concerned Party: Kerry Pitt-Hart Concern Info: We recieved an odor concern referral from the EPA. The CP States: Hello EPA Region 7 Air Team, I'm writing to document an acute air-quality episode at out home in Soulard (St. Louis, MO 63104) on Wednesday, August 27, 2025, at approximately 9:19 PM CDT and Thursday, August 28, at approximately 8:58 PM. · What happened: I briefly opened my back door and was immediately hit by a strong, irritant odor—so noticeable I could “taste” it on my tongue after only a few seconds. · Symptoms/sensations: Irritant taste/tingle on the tongue and throat; brief eye/nasal irritation. · Duration: Odor was intense on contact; I did not stay outside to gauge duration. · Weather/conditions: Calm/stagnant · Repeat history: I've reported similar concerns over several years. Requests: 1. Please confirm any exceedances, upsets, or flaring events reported this evening by nearby facilities, and whether AirNow/NowCast AQI or state monitors detected unusual O3, PM2.5, SO2, H2S, or VOC spikes in the St. Louis core. 2. Advise on the nearest regulatory monitors to my location and whether hourly data (or sub-hourly where available) show anomalies for the relevant timeframe. 3. Share the best channel for real-time community alerts when short-lived odor/irritant events occur, and any investigation case number for this report. Thank you for your help. Please confirm receipt and advise on next steps. Kerry Pitt-Hart [sic] Conclusions: On 9/3/25, Hani Hamzeh went to the Soulard area to investigate two additional odor concerns (sharepoint #14885 and 14897). He visited 12th and Lami and the surrounding the blocks and visited the South St. Louis Odor Loop. No strong odors were experienced. 9/8/25 I responded to Kerry Pitt-Hart email with: Good morning Kerry Pitt-Hart, My name is Robert Andrews and I'm the Missouri Department of Natural Resources Air Unit supervisor in the St. Louis Regional Office. I was forwarded your environmental concern from EPA Region 7. Our office responds to local concerns in the greater St. Louis metro area. I sent out an inspector to the Soulard area on Wednesday, September 3rd to look for sources of unusual odors and he was not able to identify any sources. We also checked the nearby industrial areas that could produce odors and no strong odors were identified. The Air Quality Monitoring group is based out of Jefferson City and I don't have access to air monitoring data. Will Wetherell leads the Air Quality Monitoring Unit and he may be able to help you with your air quality monitoring requests. I have copied him on this email and attached the referral concern from the EPA along with this email for his benefit. I looked up the location of our air monitors near the Soulard area and found the following monitor stations: Blair Street, NCore Site, St. Louis City Air Monitoring Site (3247 Blair St. St. Louis) Pollutants Monitored : Carbon Monoxide, Nitrogen Dioxide, Ozone, Particulate Matter, and Sulfur Dioxide Forest Park, Near Road, Air Monitoring Site (5600 Clayton Ave. St. Louis) Pollutants Monitored: Carbon Monoxide, Nitrogen Dioxide, Particulate Matter South Broadway Air Monitoring Site (8227 S. Broadway, St. Louis) Pollutants Monitored: Particulate Matter Branch Street Air Monitoring Site Pollutants Monitored: Particulate Matter For more information on the air monitoring stations, please check out the website at https://dnr.mo.gov/air/how-air-air-monitoring-sites Please let me know if you have any additional questions.

63307	9/11/2025	9/11/2025	Unknown	Odor	/St. Louis City	SLRO	JC	
Concerned Party:		Kerry Pitt-Hart						
Concern Info:		I recieved a follow up email from a previous odor concern (sharepoint 14951). The CP states: Hi Will, Thank you for your note and for reviewing past monitoring data. Unfortunately, the issue is very much present again right now. As of this morning, the AirNow app is reporting an AQI of 113 ("Unhealthy for Sensitive Groups") for our area, and the air in Soulard has a strong, unpleasant odor. Given this ongoing situation, I am requesting that someone from your team be dispatched promptly to observe and document conditions while they are occurring, rather than retroactively. A one-time review of past data is not capturing the lived experience of residents who are directly impacted. I would also like clarification on: • Which monitoring site(s) provide the AQI readings for the Soulard neighborhood. • Which pollutant was driving today's AQI of 113. • Whether compounds beyond the six EPA criteria pollutants (e.g., VOCs) are monitored or can be assessed when residents report odors. Residents deserve to know what we are breathing when the AQI reaches unhealthy levels and odors are widespread. Please let me know what immediate actions your office can take today to investigate this while conditions are measurable. Thank you, Kerry Pitt-Hart [sic]						
Conclusions:		There was an odor at the CP's location which was below the regulated level. I was unable to find an origion point or a facility responsible for the odor.

63311	8/27/2025	8/29/2025	Wire Scrappers	Open Burning Odor	/St. Louis City	SLRO	JC	
Concerned Party:		Julian Jordan						
Concern Info:		Julian Jordan stated that "scrappers" have been burning off the plastic coating on copper wiring and that they are causing odor/air quality issues that have affected both his family and his businesses. Jordan stated that he has called the city police to no avail. He thinks that the source of the concern is homeless individuals using someone else's property. Jordan asked if the people who owned the property were at fault for not securing their property properly. He stated that the C.E.O. of Justine Peterson Non-for-Profit is Rob Boyle. [sic]						
Conclusions:		I conducted a site visit and I was unable to determine if there was an illegal burn.
